**Subject:** RE: Gorge Dam Project - Special Use Permit Application for the Chuckery Area Geotechnical and Test Pit Investigation

Hi Mike and Diedre – Just following up on the Special Use Permit. We haven't received an email yet from anyone at SMP and wanted to verify SMP's water line has been marked.

We'd also like to know if someone from SMP would like to meet the Jacobs team, third-party utility locate firm, and driller on Monday morning (June 21) at 7 am to walk the drill locations one more time before starting work. Everyone will meet at the Indian Signal Tree parking lot. The contact information for our field team is:

Carol's cell: (414) 336-0284  
Kristy's cell: (414) 331-1551

We also had a question about access to a room in the building at the meeting location. I think during the last sampling event we were able to use the electrical outlet to charge equipment and are wondering if we could utilize that outlet again.

Please let us know if you have any questions.

Cheers!

Bill

This is the SUP we discussed during the meeting. Please confirm you are OK with this. They said they have not gotten it back yet and I would like to get this to them soon unless there are concerns.

**Subject:** Gorge Dam Project - Special Use Permit Application for the Chuckery Area Geotechnical and Test Pit Investigation

Mike – Attached is the Special Use Permit Application for the Chuckery Area Geotechnical and Test Pit Investigation work scheduled for the week of June 21<sup>st</sup>. This work will consist of the utility clearance, standard penetration test (SPT) drilling, and borrow source test pit work. Unfortunately we were not able to schedule the cone penetrometer (CPT) drilling at the same time and another special use permit application will be submitted for that work. It looks like the CPT drilling will be performed in mid-July but we are in the process of confirming the date.

Please let us know if you have any questions or need any additional information.

Cheers!

Bill
